### DETAILED ACTION

1. Applicants amendment was received 8/4/97 as Paper No. 10.
2. Claims 90-99 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

The specification discloses SEQ ID NO. 2 which corresponds to the nucleic acid sequence encoding the prostate specific antigen having the amino acid sequence shown in SEQ ID NO. 2. This SEQ ID No. 2 meets the written description and enablement provisions of 35 U.S.C. 112, first paragraph. However the claims are directed to encompass a nucleic acid molecule (i.e. primer) that hybridize to the nucleic acid sequence encoding the prostate specific antigen having the amino acid sequence shown in SEQ ID NO. 2 or other sequences, which correspond to sequences from other species, mutated sequences, allelic variants, splice variants, sequences that have similarity or homology, and so forth. None of the these nucleic acid molecule (i.e. primer) or nucleic acid molecules encoding a prostate specific membrane antigen meet the written description provision of 35 USC 112, first paragraph.

Vas-Cath Inc. V. Makurhar, 19 USPQ2d 1111, makes clear that applicant must convey with reasonable clarity to those skilled in the art, as the filing date sought, he or she was in possession of the invention. The invention is, for purposes of the written description inquiry

whatever is now claimed (see page 1117). The specification does not "clearly allow persons of ordinary skill in the art to recognize that [he or she] invented what is claimed. (See Vas-Cath Inc. V. Makurhar, page 1116.).

With the exception of SEQ ID No. 2 the skilled artisan can not envision the detailed chemical structure of the encompassed polynucleotides and therefore conception is not achieved until reduction to practice has occurred, regardless of the complexity or simplicity of the method of isolation. Adequate written description requires more than a mere statement that is part of the invention and reference to a potential method for isolating it, The nucleic acid itself is required,. See *Fiers v. Revel*, 25 USPQ2d 1601, 1606 (CAFC 1993) and *Amgen Inc. V. Chugai Pharmaceutical Co. Ltd.* 18 USPQ 2d 1016.

One can not describe what one has not conceived. See Fiddes v. Baird 30 USPQ 2d 1481, 1483.
